Product Descriptions

Description of the gaming product is given below:

Big Bass Crash

"Big Bass Crash" is a crash game. The objective is to collect the highest possible win before the multiplier crashes. The player can collect the current win at any given moment using the "CASHOUT" or "CASHOUT 50%" buttons.

The player can also choose a value for "Auto Cashout" or "50% Auto Cashout" which will perform automatic cashout, without the intervention of the player, if the current value in game exceeds the set by the player value.

Return to Player Percentages

GLI has performed an independent calculation of the theoretical Percentage Return to Player (RTP%) values of the games, and the results are shown in the table below.

Game Name	Supplier's Paytable ID	In Game %RTP	Supplier's Submitted %RTP	GLI's Game %RTP
Big Bass Crash	N/A	95.50%	95.50%	95.50%

GLI has confirmed that the published RTP values (shown) either:

- a) lie within expected statistical limits of equivalent values computed from simulated test data, or
- b) match those derived analytically from a mathematical model of the game.

Conclusion

GLI Europe B.V confirms the product(s) listed in this report do not conflict with the technical provisions laid out in the Ministry of Finance Order No. 243, dated 1 October 2020. Within this frame work any products listed are deemed compliant.

If you should have any questions regarding this information, please feel free to contact our office.

Sincerely,

Martin Britton
Managing Director
