

Virtual Sports: Steeplechase Rules

Virtual Steeplechase from Pragmatic Play brings you 24/7 racing action from Douglas Downs.

All bets placed on Virtual Steeplechase will be subject to these rules and our Terms and Conditions.

Virtual Races

- There are between 16 and 24 horses in each race
- All races are non-handicap
- Races run in sunny or dull conditions
- The form of each horse is used to ensure that each contest is unique
- Each race lasts approximately 90 seconds

We offer a range of betting markets in Virtual Steeplechase including Win, Each Way, Non-Finishers, Forecast, Tricast and Multiples.

Selected markets have an Each Way option, for further information see the 'Each Way Bets' section below.

For further information on Forecast and Tricast bets, see the 'Forecast and Tricast Bets' section below.

For further information on Multiple bets, see the 'Multiples' section below.

General Rules

- Each race starts with an introduction showing all the runners along with their number and odds. The race starts after the introduction
- Due to the nature of streaming, the commentary information may be out of sync with the video stream. This is normal and has no effect on the race outcome
- Once the race has finished there will be a replay of the first 4 horses crossing the finish line and the result of the race will be shown
- After the result of each race has been shown, the introduction to the next race appears
- All bets will be settled at the odds stated before the race
- While a race is in progress the odds for future races are available below the video. A countdown shows when bets close for the next race, and after this has expired the betting markets will automatically refresh to show the odds for the next available race

In the event a race does not start or the outcome is incomplete meaning that the result cannot be determined (for any reason) the race will be voided and refunds will be applied as stated in these rules and our Terms and Conditions.

All bets placed against incomplete games that cannot be resolved automatically will become void after a minimum of 90 days and the stake will be returned to the player.

Odds Range

The odds can be expressed in decimal or fractional format:

- The minimum decimal odds for an individual market is: 1.01
- The maximum decimal odds for an individual market is: 501
- The minimum fractional odds for an individual market is: 1:100

- The maximum fractional odds for an individual market is: 500:1

Bet Markets

Betting on a race is allowed up to 10 seconds before it starts. Betting markets for future races remain open. When a future race is selected by clicking on its start time, the odds will be displayed beneath it.

Each Way Bets

Choosing Each Way creates two separate bets, doubling the stake. To satisfy the Each Way portion a selection only needs to place rather than win outright.

The number of places we pay out on is set out in the table below and will always be shown on bet slip.

No. of Runners	Odds	Places
8-15	1/5	1st, 2nd and 3rd
16+	1/5	1st, 2nd, 3rd and 4th

Single Markets

Win

Predict the winner of the race

This bet has an Each Way option.

Number of non-finishers

Predict how many horses will fail to finish during a race, options are 0 (all horses finish), 1, 2, 3, or 4.

Sum of placed horse numbers – Under/Over

Predict if the sum of the first 4 horse's numbers to cross the finish line will be lower or higher than the threshold.

Winning Number Odd/Even

Predict if the winning horse has an odd or even number.

Forecast & Tricast Bets

Straight Forecast

Also known as a 'forecast', predict which horses will come first and second in a race (in that order). To place a forecast bet use the boxes beneath the 'Forecast' tab. Select the horses you predict to finish 1st and 2nd by clicking the '1st' and '2nd' boxes against your selections. Then tap or click on the 'Add to Betslip'

button.

Enter a stake and click 'Submit Bet' to place the forecast bet.

Reverse Forecast

Predict which horses will finish in the top 2 places in any order. It costs twice your stake because you are placing 2 straight forecast bets. You need to select the horses you predict to finish in the top 2 by clicking the 'Any' boxes against your selections. Then tap or click the 'Add to Betslip' button.

Enter a stake and click 'Submit Bet' to place the reverse forecast bet.

Tricast

Predict which horses will come first, second and third in a race (in that order). To place a tricast bet use the boxes beneath the 'Tricast' tab. Select the horses you predict to finish 1st, 2nd and 3rd by clicking the '1st', '2nd' and '3rd' boxes against your selections. Then tap or click the 'Add to Betslip' button.

Enter a stake and click 'Submit Bet' to place the tricast bet.

Reverse Tricast

Predict which horses will come first, second and third in a race (in any order). To place a tricast bet use the boxes beneath the 'Tricast' tab. Select the 'Any' boxes against your selections. Then tap or click the 'Add to Betslip' button.

Enter a stake and click 'Submit Bet' to place the reverse tricast bet.

MULTIPLES

Multiple Bets combine win selections from two or more races into a single bet. Only one winner per race may be included.

The maximum number of selections for a multiple bet is 4, if additional selections are made the multiple options will be removed from the bet slip and only the bets on the single events will remain.

Double

A Double consists of two selections, both must win for a return.

Treble

A Treble consists of three selections, all three must win for a return.

Fold Bets

A multiple bet of four or more selections is called a Fold. Also known as an Accumulator, they can be four-fold, five-fold, six-fold or more depending on how many bets they contain. All the selections must win for a return.

Trixie

A Trixie places four bets on three different selections. Two or more selections winning will generate a return.

The four bets in a Trixie are three doubles and a treble.

Patent

A Patent places seven bets on three different selections. One or more selections winning will generate a return.

The seven bets in a Patent are three singles, three doubles and a treble.

Yankee

A Yankee places 11 bets on four different selections. Two or more selections winning will generate a return.

The 11 bets in a Yankee are six doubles, four trebles and a four-fold.

Lucky 15

A Lucky 15 places 15 bets on four different selections. One or more selections winning will generate a return.

The 15 bets in a Lucky 15 are four singles, six doubles, four trebles, and a four-fold.

Each Way

Multiple bets offer an each-way option. An Each Way bet is still 2 bets - 1 for **ALL** selections to win and 1 for **ALL** selections to place. This means that if one of your selections does not win or place the whole bet is lost.

For example, if you were to place a 4 horse each way accumulator and 3 horses won while the other one placed you would still receive the place part of the accumulator at reduced odds. You wouldn't receive more winnings because only 3 out of 4 horses won.
